PROFILE

Fourth-year Software Engineering student at SCE (Sami Shamoon), graduating 2027. I build full-stack and AI-powered applications end to end — FastAPI/React backends, RAG pipelines with OpenAI, and role-based security — and ship them as live demos. Looking for a student position in Full Stack / AI development.

FEATURED PROJECTS

CourseMind – AI Study Assistant *Python, CrewAI, OpenAI, Chroma, Streamlit* Live Demo | GitHub

- RAG assistant: upload course PDFs, ask questions, get full-document study summaries; every answer cites file and page, and replies "not found" instead of guessing.
- Query-understanding router (page / overview / metadata / semantic) with deterministic guards, and an evaluation suite used to measure answer quality.

HEMORA – Clinical Decision Support Prototype *FastAPI, React, TypeScript, PostgreSQL, Docker* Live Demo | GitHub

- Hebrew RTL system that tracks blood tests over time, compares each result to the previous one and explains every finding and its reference range; exports PDF reports.
- Four-role access control (admin, doctor, clinic, patient) enforced server-side on every endpoint; 86 automated backend tests, Docker Compose setup.

ANTE – CI/CD Academic Learning Platform *Team of 4 · Flask, SQLAlchemy, pytest* Live Demo | GitHub

- Platform teaching CI/CD with an in-browser Monaco editor and student / lecturer / admin panels; GitHub Actions CI.
- Security: Python code runner with import blocking, restricted built-ins and a time limit; CSRF protection, login lockout, audit log.

Leviathan – AI Study Companion *Hackathon team · JavaScript, PostgreSQL, REST* Live Demo | GitHub

- Multilingual (Hebrew, Arabic, English; RTL) learning platform with an AI tutor, quizzes, study video feed, interview practice and coding challenges.

MORE PROJECTS

Student Request Management – Django, email 2FA, multi-role approval workflow Demo | GitHub

Travel Agency System – ASP.NET Core MVC, SQL Server, Identity, waiting-list logic Demo | GitHub

MedSafe Race Lab – Java 17, JavaFX, JUnit; race condition vs synchronized / ReentrantLock / Semaphore Demo | GitHub

Minecraft 2D – vanilla JavaScript browser game, no frameworks Play | GitHub

EDUCATION

B.Sc. Software Engineering – Sami Shamoon College of Engineering (SCE), Beer Sheva 2023 – 2027 (expected)

Coursework: Full Stack Development, Artificial Intelligence, Secure Software Development. Grades: C++ – 97, Python – 85, C – 85.

TECHNICAL SKILLS

Languages: Python, JavaScript / TypeScript, C++, C, Java, C#, SQL

Web: React, FastAPI, Django, Flask, ASP.NET Core MVC, REST APIs, HTML / CSS

AI: OpenAI APIs, RAG, Chroma, CrewAI, AI Agents, LLM evaluation

Data & DevOps: PostgreSQL, MySQL, SQL Server, Docker, Git / GitHub, GitHub Actions CI, Linux / WSL, Netlify

Security: Secure coding, role-based access control, CSRF protection, 2FA, sandboxing

VOLUNTEERING & LANGUAGES

Rakaib Al-Khair – community aid activities in a team · **Parents' Night Patrol** – neighborhood safety patrols

Arabic – Native · **Hebrew** – Very Good · **English** – Good
